Each team member is a vital and fundamental part in the development of applications and modules, utilizing our platform. As a team, we will decide our development goals and each team member takes full responsibility of completing the tasks assigned to him or her.

Full time 8:30 – 17:00

Location: Malaga

Availability to travel to Sweden (at the beginning selected candidate will spend 2 weeks in Stockholm for training).

**We are:**

We started as an internal development department but are now an independent software development company.

We are developing applications that are web-based, native and progressive. We at Divundo are at the moment developing apps for the event industry with it's never ending demand for new functionality. The systems that we develop today are used worldwide.

The meeting industry is huge and needs a constant inflow of new products and services. This area is one of our development areas in witch we have a long experience and where we continually are seeking for new possibilities.

Divundo is part of the company group Sintell AB based in Stockholm Sweden
